C6

Below are examples of the Broodstock and bloodlines used in producing this year class.

Leney Bloodline

Leney x Dink 1st Gen

Harrow 1st Gen

Dinkesbuehl Bloodline

Sutton x Leney 1st Gen

Sutton Bloodline

Firstly thank you for purchasing your carp stocks from VS Fisheries. We hope that they thrive in their new homes and please let us know how they progress over the years to come. To allow you to track these fish, we thought that we would provide you with details of the fishes' history up to the day when they are delivered to your fishery.

2016 Sovereign Year Class History & Information

This year class contains a mix of distinct crosses from original bloodlines and 1st generation crosses, all of which have a very good track record in fishery terms. This means you receive a batch of fish that all offer great potential to be large fish in the future along with having very individual looks and characteristics.

The fish within this year class consist of the following bloodline crosses;

Leney x Sutton	x	Harrow
Leney x Dink	x	Leney x Dink
Harrow	x	Harrow
Leney x Dink	x	Harrow
Sutton	x	Harrow
Leney x Sutton	x	Leney Dink
Dinkesbuehl	x	Harrow

All the fish above were spawned on the 23rd May 2016.

Since their introduction to our fry ponds the fish have been reared on a mixture of the following feeds; Trout Fry Crumb, Low Oil Carp Pellet and High Energy Carp Pellet

All VS Fisheries Ltd fish are graded and hand selected personally by Viv and Simon to ensure that you receive only the best for your fishery.

Wishing you every success with your new fish and we look forward to working with you in the future.
